

## LUCA CATTIDE

Italy (CET) ↔ Full-Remote (EU work rights) ↔ [lucacattide@pm.me](mailto:lucacattide@pm.me) ↔ (+39) 327 241 8830 ↔ [lucati.de](https://lucati.de) ↔ [linkedin.com/in/lucatide](https://linkedin.com/in/lucatide) ↔ [github.com/lc-2025](https://github.com/lc-2025)

## SOFTWARE ENGINEER

- Software Engineer with 9+ years of experience developing multiplatform websites/apps in 6 companies
- Proven knowledge of 40+ languages/tools (including HTML, CSS/SASS, JavaScript/TypeScript), Frontend libraries/frameworks (e.g. jQuery, React), Backend (NodeJS, Express), and essential working software on 39+ projects created
- Remote work in national/international teams - in consultancy for 2 digital agencies and 3 companies; autonomous multitasking project management with agile methodology; direct attention to responsive implementation of UI, UX, usability and cross-browser testing/debugging; to implementation of API, database and testing/debugging, other than integration and delivery
- Constantly updated on the latest frameworks/technologies, with 5 certificates + 6 certifications acquired and progressively increasing

## WORK EXPERIENCE

### Career Break

October 2023 - Present

- Explored professional opportunities in Holistic Consulting, enhancing collaboration, adaptability, and time management skills; now eager to re-enter the tech industry with my 9+ years of experience, strengthened by individual study of latest Fullstack technologies and trends
- Developed a Fullstack responsive crypto e-commerce website based on MERN of 4 sections, with internal search/filtering functionality & related market API integration; released on cloud platform; CI/CD support; data managed through REST/GraphQL API
- Technologies: HTML, CSS/SASS, Flexbox, JavaScript/TypeScript, React, TailwindCSS, Motion, Redux, NextJS, Express, NodeJS, GraphQL, Apollo, MongoDB, Postman, Swagger, CoinGecko API, Jest, Testing Library, Cypress, Bash, GitHub/GitFlow, Husky, Docker, Vercel, Render, Figma

### Senior Software Engineer ↔ Avast/NortonLifeLock/Gen

May 2021 - October 2023

- Involved in the research and development process of new web technologies and their application on 9+ projects intended for both the market and internal company use, through design, implementation, and drafting of technical documentation according to agile methodology via Scrum framework
- Collaboration and sharing at an inter-departmental level between the involved teams - Quality Assurance, Design, Product Management, and Lead - of 9+ realized projects, both in the development phase and at the presentation stage
- Developed 9+ Fullstack projects/POCs between web applications/extensions, APIs, and their integration (including maintenance); usage of Cloud platforms; CI/CD support
- Implemented and managed the fundamental content integration functions and their delivery in the development, testing, and production environments (DevOps) of the platforms used, for 9+ realized projects/POCs
- Developed an extension for notification release of new project/POCs integration review requests by the technical team on a dedicated working chat channel, with a reduction in approval times to over 66% of the average generated
- Developed an extension for notification release of updates about new integrations on projects/POCs by the technical team on a dedicated working chat channel - shared at an inter-departmental level - with the benefit of collective sharing processes status and consequent 25% reduction in communication timing
- Developed a shared library for automatic loading of realized project application configurations, with the chance of remote management by non-specialized figures and elimination of intervention times
- Technologies: HTML, CSS/SASS, Flexbox, JavaScript/TypeScript, Webpack, Rollup, React, Material-UI, Redux, Svelte, Storybook, Express, NodeJS, MongoDB, PostgreSQL, Postman, Swagger, Jest, Testing Library, Playwright, Bash, GitHub/GitLab/GitFlow, Docker, Google Cloud Console, AWS, TeamCity, Agile/Kanban/Scrum/JIRA, Slack, Microsoft Teams, Figma

### Self-Study

July 2019 - May 2021

- Took a professional break to learn the MERN stack in depth through self-study, strengthening my 7+ years of previous experience in Fullstack development
- Developed a localized responsive Fullstack portfolio website based on JAMstack principles, consisting of 4 sections/10 projects, with progressive web app specifications, AR/VR functionality, blogging API integration & video/live stream; released on cloud platform; CI/CD support; content managed through headless CMS with GraphQL API
- Created a responsive Fullstack blog based on JAMstack principles, consisting of 15 categories, with progressive web app specifications, RSS feeds, internal search/filtering functionality & mailing list API integration; released on cloud platform; CI/CD support; content managed via headless CMS with GraphQL API
- Developed a localized responsive Fullstack fintech SPA with 20+ user budgeting features, including progressive web app specifications, server-side rendering & cloud storage integration; data managed through GraphQL API; released on cloud platform; CI/CD support
- Technologies: HTML, CSS/SASS, Flexbox, Compass, JavaScript, jQuery, Bootstrap, Gulp, Webpack, PHP, SQL/MySQL, SilverStripe, Capistrano, Vue, Laravel, PrestaShop, Gitlab/GitFlow, SourceTree, Vagrant, Google Analytics/Tag Manager, Adobe Creative Cloud, Agile/Kanban/Trello

### Fullstack Developer ↔ GreyLab

February 2017 - July 2019

- Developed 15+ Fullstack projects between websites/web apps - including 1 international remote team collaboration for the main massif Italian whiskey e-commerce, and 11 maintained
- Automated and improved the corporate IT inventory management process with a fullstack web app, with a processing time of the human resources involved reduced by 50%
- Trained the creative team in copywriting and SEO techniques; content localization (Italian/English) and SEO of 11 launched projects
- Technologies: HTML, CSS/SASS, Flexbox, Compass, JavaScript, jQuery, Bootstrap, Gulp, Webpack, PHP, SQL/MySQL, SilverStripe, Capistrano, Vue, Laravel, PrestaShop, Gitlab/GitFlow, SourceTree, Vagrant, Google Analytics/Tag Manager, Adobe Creative Cloud, Agile/Kanban/JIRA

### Senior Frontend Developer ↔ Laboratorio-a

April 2016 - December 2016

- Developed and maintained 8+ Frontend projects across websites, web/mobile apps - including 1 remote team collaboration managed via Scrum framework
- Mentor and coach of 1 junior team member on Frontend, SEO and SMM development languages/tools
- Technologies: HTML, CSS, JavaScript, jQuery, Bower, Gulp, Webpack, PHP, SQL/MySQL, GitHub, Google Analytics, Facebook, Adobe Creative Cloud

### Owner, Frontend Developer ↔ Karalis Konnection di Luca Cattide

2013 - 2016

- Developed and maintained 12+ Frontend projects across websites/mobile apps, and 4 designed UIs
- Created the studio companion mobile app for Android systems, with customizable quote functionality for 30+ services, geo-localized helpdesk booking, and customer communication
- Technologies: HTML, CSS, JavaScript, jQuery, PHP, SQL/MySQL, Joomla, PhoneGap, GitHub, Google Analytics, Facebook, Adobe Creative Cloud

## EDUCATION

### Remote Working: Setting Yourself and Your Teams Up for Success ↔ LinkedIn

October 2020

### Learn React Course ↔ Codecademy

October 2018

### Accountant Programmer ↔ I.T.C.S. "P. Martini" ↔ Cagliari, Italy

1998 - 2005

- Accounting & banking techniques, Computer Science, English

## INTERESTS

Acquired Chinese martial arts (Kung Fu Shaolin, T'ai Chi Ch'uan, Sanda) for 14 years, with 5 awards/recognitions obtained

## SKILLS

- Frontend: HTML, CSS, SASS, Compass, Flexbox, TailwindCSS, Material-UI, BEM, JavaScript, Motion, Typescript, React, NextJS, Redux, SEO
- Backend: NodeJS, Express, SQL/NoSQL, PostgreSQL, MongoDB, Swagger, GraphQL
- Tools: Jest, Testing Library, Cypress, Apollo, Postman, Workbox, GitHub, Husky, Docker, Google Analytics/Tag Manager/Cloud Console, AWS, Vercel, Render
- Other: Bash, GitFlow, DevOps

I authorize the processing of personal data due to the Italian legislative decree N. 196/03 and 679/16.
